## NGAGA CAMP

---

In the depths of a tropical marantaceae forest, on the edge of Odzala-Kokoua National Park, Ngaga Camp offers a true gorilla experience.

Built from local, sustainable materials and inspired by the designs of the Ba'Aka Pygmy groups, it has been built with the lightest possible environmental impact. Each of the 6 rooms has a wrap around walkway for 360 degree views of your environment. They are designed using local, naturally sourced materials and inspired by local designs. On the deck there is a fire pit, with views to the pristine banks of the Ngaga River and evenings are usually spent sitting here swapping the stories of the day and absorbing the forest atmosphere.

Explore the surrounding forests on foot and track the local population of western lowland gorillas. At night you can go for walks, hoping to track nocturnal primates such as the Central Potto.
